

PRE-SEED · MAY 2026

Relifish

Fresh fish delivered under 2 hours.

Direct from trusted local sellers.

No warehouse. No middleman markup.

relifish.store · Founder

THE PROBLEM

Fish sellers still run on calls, WhatsApp, guesswork, and walk-in demand.

Seller problem

 WhatsApp, Excel & Cold Call limits.	Sellers fail to scale orders because managing regular customers over WhatsApp threads, phone calls, and spreadsheets is highly unscalable.
 Buggy, non-scalable home-brewed tech.	Sellers trying to patch together their own digital tools hit immediate tech bugs, high complexity, and zero scalability.
 Price fatigue & poor conversion.	Endless phone bargaining and daily pricing guesswork lead to customer drop-off and no real conversions.
 Anxiety of inventory loss.	High stress and daily anxiety of unsold fresh catch rotting after 2:00 PM due to zero predictable demand.

Buyer problem

 No species variety.	Hard to compare options or find a wide variety of fresh fish from a single stall.
 Slow or expensive delivery.	Standard delivery apps charge heavy markups and take hours or days to deliver "fresh" inventory.
 Freshness & trust gap.	Traditional apps sell frozen, days-old packets; local markets require early morning walk-in haggling.
 Direct pricing barrier.	Buyers pay marked-up reseller prices instead of getting cheaper rates from trusted local sellers with guaranteed terms.

Relifish answer: Fresh fish delivered under 2 hours by connecting buyers directly with trusted local sellers.

THE SOLUTION

Relifish as the Solution

For Sellers

	Live catalog sharing.	Share your digital store/catalog URL link instantly via WhatsApp and social media to capture regular orders.
	Inventory management.	Easy mobile dashboard to adjust morning stock limits, species availability, and prevent rotted waste.
	Shop timing control.	Configurable open/closed hours to control exactly when active buyers can place orders.
	Pre-order & live support.	Dual support for instant same-day delivery and reserving tomorrow's catch the night before.
	Delivery fee & radius config.	Granular settings for custom delivery charges, minimum order value, and geo-delivery radius.
	Order & UPI management.	Track order lifecycle, verify digital payment UPI screenshot proof, and manage COD.
	Customer ratings & reviews.	Direct ratings feed to build trusted local reputation and reward high-quality service.

For Buyers

	Find nearby sellers.	Auto-discover hyper local verified sellers and local fish stalls within 3km of their location.
	2-hour fast delivery.	Fresh catch prepped, cleaned, and delivered from stall to doorstep in under 120 minutes.
	Step-by-step journey.	Clean flow to discover stalls → browse live catch → pay via UPI → track doorstep delivery.
	Best market prices.	Direct seller pricing with zero markup or hidden delivery-app fees.
	Trusted ratings feedback.	Verified seller profiles, customer ratings, and no early chaotic morning market walks.

HOW IT WORKS

Commission protection is structural, not policy.

No phone numbers. No WhatsApp contacts. No cash-at-door. All communication through Relifish. Leakage = zero.

PRODUCT & TOOLING

Full MVP live at relifish.store — built in weeks, not months

Buyer Experience (4 Steps)

- 1. Discover:** Auto-detect location to find nearby Koli sellers within 3km.
- 2. Browse:** View morning catch listings with live pricing, bundles, and photos.
- 3. Confirm:** One-click checkout with secure UPI payment screenshot upload.
- 4. Receive:** Fresh fish cleaned, prepped & delivered in under 2 hours.

Seller Dashboard SaaS

-  **Live Shop URLs:** Custom links (e.g. relifish.store/stall-name) shared on WhatsApp/socials.
-  **Shop controls:** Flexible opening operating hours, shop pause/resume, and pre-order slots.
-  **Delivery rules:** Upfront custom delivery charges, geo-delivery radius limits, and minimum order values.
-  **Ratings & feedback:** Integrated feedback reviews to build local reputation.

Inventory & Order Ops

-  **Stock automation:** Auto-limit inventory, Out-Of-Stock thresholds, and daily buyer caps.
-  **Order pipeline:** Real-time push + email alerts, order search by ID/phone, and bulk status updates.
-  **Revenue tracking:** UPI screenshot payment verification, COD support, and CSV business reports.
-  **Bilingual layout:** Native Marathi & English dashboard for unserved wet-market merchants.

CURRENT STAGE + PROGRESS

**Product built. Awareness stage live.
4 sellers acquired.**

Live

Product shipped
Buyer + seller flows

4

Sellers acquired
Milestone reached

Now

Awareness stage
Demand validation

Next

Transactions
Price + freshness conversion

Stage honesty: We have built the product and acquired initial sellers; the next proof is converting local awareness into repeat transactions.

USER QUESTION

Are we changing the internal customer by solving seller operations first?

Answer

Yes. The first internal customer is the seller's operating workflow: catalog, order confirmation, payments, delivery, customer memory, and service quality.

Why it matters

If sellers cannot operate reliably, buyer demand breaks. Relifish makes sellers operationally ready before adding external buyer volume.

Sequence: Internal seller operations tested enough → external buyer demand comes through ads, seller sharing, and local density campaigns.

WHY SELLERS STICK

Different seller stages. One goal: sell better.

Service

Orders are confirmed, tracked, and notified instead of getting lost in calls and WhatsApp.

Quality

Ratings and repeat buyers reward sellers who consistently deliver fresh fish well.

Price

Sellers control prices, delivery fees, radius, minimum order, and fulfillment promise.

Better decisions

Customer history and demand patterns help sellers buy and sell with less guesswork.

Less chaos

Live inventory, order alerts, UPI/COD proof, and order states reduce manual coordination.

Growth

Relifish starts with existing regulars, then brings nearby buyers through density marketing.

WHY BUYERS STICK

Better price, better freshness, better experience.

Fresh under 2 hours

The promise is easy to understand and easy to repeat.

Best prices

Direct seller pricing avoids delivery-app markup.

Trusted sellers

Seller profiles, ratings, order history, and WhatsApp make trust visible.

Huge variety

Multiple sellers create more choice than one stall.

No walk-in market

No early market trip, no haggling, no sold-out disappointment.

Weekly habit

Fish is bought often; a better routine can become repeat behavior quickly.

UNFAIR ADVANTAGES

Six structural reasons this works — and incumbents can't copy it.

01 Asset-Light Pure Marketplace

No inventory, no delivery, no packaging. Sellers handle everything. Pure software take rate from Day 1.

02 Pre-Orders (Nobody Else)

Buyer orders tonight, seller reserves catch. Reduces 25% waste. Fundamentally new behaviour in Indian fish retail.

03 Zero-CAC Distribution

1 seller = 50 regulars. Sellers ARE the growth engine. No paid ads needed for first 500 buyers.

04 Commission Leakage = Zero

Upfront online payment. No contact info shared. No cash-at-door. Structural protection, not a policy.

05 WhatsApp-Native Workflow

500M+ on WhatsApp. Formalises the workflow sellers already run — but now with mandatory payment flow.

06 Category Creation

\$930M funded warehouses. \$0 funded fishermen. We own an entirely new category nobody has addressed.

6 structural moats. No delivery required. Pure platform. \$930M+ proved the category exists — nobody built for the seller.

USER ACQUISITION + MARKET ACQUISITION

Density with hyperlocal sellers, ratings, and the right customers.

SUPPLY POINT

Existing seller. Start around sellers already acquired and trusted locally.

USER ACQUISITION

Koli community trust. Leverage Koli community relationships to organically capture and defend the hyperlocal demand.

RIGHT CUSTOMER

Freshness + price. Target buyers who already buy fish and value delivery convenience.

DENSITY LOOP

Ratings + repeat. Reviews build trust, repeat orders build the local playbook.

Market acquisition strategy: Seller location → marketing bundle → nearby ads/flyers → first orders → ratings → repeat buyers → more sellers in the same cluster.

ORDERING & DISTRIBUTION PLAYBOOK

Structured ordering, efficient delivery & repeatable playbook

1. Ordering Workflow

Buyer selects fish, confirms pre-order, instant UPI verification, real-time inventory lock.

2. Distribution Model

Hyper-local hubs → rider network → 2-hour delivery window, temperature-controlled packaging.

3. Playbook Milestones

Day-0 onboarding → Day-3 first repeat → Day-30 scaling to 2 km radius, KPI-driven expansion.

CAPITAL ALLOCATION + OUTPUT

How the money gets invested, and how output comes.

Input

New marketing bundles, flyers, QR standees, seller cards, WhatsApp creatives, and nearby ads around existing sellers.

Process

Spread awareness, validate buyer interest, test seller service quality, and convert with better prices and freshness.

Output

First transactions, ratings, repeat orders, seller confidence, delivery density, and a repeatable cluster playbook.

Capital rule: Spend close to supply, prove demand locally, and scale only where transactions and repeat orders appear.

ORDERING & DISTRIBUTION PLAYBOOK

Structured ordering, efficient delivery & repeatable playbook

1. Ordering Workflow

Buyer selects fish, confirms pre-order, instant UPI verification, real-time inventory lock.

2. Distribution Model

Hyper-local hubs → rider network → 2-hour delivery window, temperature-controlled packaging.

3. Playbook Milestones

Day-0 onboarding → Day-3 first repeat → Day-30 scaling to 2 km radius, KPI-driven expansion.

MONETISATION STRATEGY

**Validate demand first.
Monetize transactions after liquidity.**

AFTER VALIDATION

5-8%

Transaction take rate

Free to list while liquidity is forming;
monetize when seller-buyer transactions
are proven.

DENSITY STAGE

₹30-79

Delivery fee

Delivery contribution improves as sellers
and buyers cluster in the same area.

FUTURE

Growth

Seller tools + visibility

Promoted listings, analytics, buyer
reactivation, B2B supply, and market data.

UNIT ECONOMICS

Clean from Day One — pure software margin.

Per Order Economics

GMV per order	Rs 820
Commission (6.5%)	+ Rs 53
Payment gateway (2%)	– Rs 16
Gross Margin / order	Rs 37
Gross Margin %	4.5%

No delivery cost. No packaging cost. Pure software margin.

Key Metrics

Rs 130	Rs 4,018
Blended CAC Physical + digital	LTV (target) 2–3x/wk, 6.5% take
31 : 1	3.7 mo
LTV : CAC Non-discretionary fish	Payback period Fast repeat purchases
40%+ target	7
D30 retention High-frequency category	Orders/buyer/mo 2–3x/wk

₹37 gross margin per order from Day 1. No delivery cost. No packaging cost. Expenses = staff + marketing + infra only.

MARKET + POSITIONING

A massive wet-market category needs a hyperlocal digital layer.

₹1.7L Cr

India domestic fish market
Large, frequent, perishable

71%

Simple buyer promise

Direct

No middleman markup

Dense

Cluster-by-cluster GTM

Positioning: Relifish is not a warehouse seafood brand; it is the hyperlocal marketplace for fresh fish from trusted sellers near you.

WHY NOW & WHY ME

The market is ready. The product is already built.

Why Now

- **Online buying is accepted.** Customers already trust digital ordering for food and groceries.
- **Local sellers need tooling.** WhatsApp demand is real, but operations do not scale.
- **UPI is default.** Payments are no longer the adoption blocker.
- **Freshness gap is visible.** Buyers know the difference between market-fresh fish and warehouse stock.

Why Me

- **Marketplace veteran.** Previously built and scaled a hyperlocal marketplace from scratch, handling end-to-end product development.
- **Full-stack founder.** Designed and shipped the seller dashboard, buyer experience, and logistics tooling single-handedly.
- **Close CTO collaboration.** Worked hand-in-hand with CTOs and founders, driving product decisions and rapid iterations.
- **Zero-to-one specialist.** Proven track record of taking concepts from idea to live product without external help.

THE ASK

Pre-Seed Round

₹25 Lakhs

6 months runway · Convert awareness to transactions · Prove density playbook · Future plans are big but need the stepping stone of funding

Current milestone

- Product built
- Awareness stage live
- 4 sellers acquired
- Seller ops testing underway

Use of funds

- New marketing bundles
- Flyers and standees
- Nearby ads around sellers
- Delivery and ops validation

Next output

- First buyer clusters
- Validated transactions
- Ratings and repeat orders
- Replicable local playbook

Relifish

Fresh fish delivered under 2 hours.

Trusted local sellers. Better prices. No market walk-in.
